EXPERIENCE

Software Engineer at CommercialTribe
October 2015 – Present
Developing the API and email communication server for the CT app to serve iOS, Desktop, and Web clients. Responsible for building out new features, refactoring unstable code and improving unit test coverage. Core technologies used for the API include Node.js, Express, Jasmine, Mongoose and MongoDB.

Programming Instructor at KidCodeIt
August 2015 – Present
Teaching children to code in JavaScript, HTML and CSS from ages 9 and up. Currently teaching one-on-one lessons part time.

Full Stack JavaScript Student at RefactorU
June 2015 – August 2015
Attended MEAN stack JavaScript bootcamp training in Node.js, Express, AngularJS and MongoDB.

Data Analyst at BKV Advertising
July 2014 – March 2015
Appointed to develop a cross-channel reporting framework and methodology to be used agency-wide for all client facing reports. Created data visualizations for cross-channel reporting including SEM, Display Advertising, DRTV, SEO and Social Media channels. Built interactive, automated dashboards in Excel. Implemented analytics event tracking via Google Tag Manager and JavaScript.

Junior SEO Specialist at BKV Advertising
August 2013 – July 2014
Performed keyword research and documentation of SEO Strategy for clients. Provided technical architecture, HTML markup, and usability recommendations to improve website crawlability and user experience.

Managing Director at Clear Vision Design Group
Jan 2012 – August 2013
Directed graphic and web design projects for small to mid-size business clients. Consulted clients on creative direction and online marketing strategy.
